Oracle E-Business Suite: Continuity in periods of change

At the beginning of 2015, Huhtamaki Films separated from the Finnish Huhtamaki Group. This business unit producing special foils for the consumer goods market and industry has since continued its production on its own as Infiana Group. 2019 Infiana was integrated into the the Loparex group.

Long-standing and close cooperation

For many years, PDG has competently supported the Huhtamaki Group, and thus the former business unit and present Loparex, at the sites of Forchheim and Ronsberg as Oracle Partner. Numerous EBS modules have been introduced and the data exchange with many Huhtamaki business partners has been simplified through B2B connections. PDG has realized individual customizations using Oracle Tools. As part of the BI project, PDG is implementing a cross-locational and cross-system data warehouse.

To be continued...

It has only been logical to continue this longstanding partnership also under a new flag. The first joint project was the adaption of Forchheim's software applications to the new Infiana server landscape. It took just one weekend to realize - absolutely smoothly and with some gain of speed - the transfer of the applications to the new hardware.

Meanwhile PDG has established a support infrastructure for Loparex. PDG assumes full technical operational support and technical system support, and for the hardware, databases and Oracle E-Business Suite.

Overview of all tasks

- Planning and realization of a new server landscape at Infiana's production site Forchheim
- Installation of the required applications in the new hardware
- Assumption of full technical system support for the hardware, databases and Oracle E-Business Suite
- Assumption of full technical operational support for the Oracle E-Business Suite
- Establishment of a support infrastructure
- Creation of customizations on the basis of Oracle Tools
